LOT 2 - Farmall 460 Diesel Tractor with F11A Loader, 1960s

Description

Vintage Farmall 460 diesel tractor equipped with Farmhand F11A materials-handling loader attachment and rear blade. Manufactured by International Harvester in the early-to-mid 1960s, this iconic farm workhorse features the original 460 diesel engine with functional PTO. The tractor includes the Farmhand branded front-end loader with bucket attachment (serial no. 2524), manufactured in Hopkins, Minnesota by Superior Separator Co.

The tractor has retained most of its original components including the distinctive red and white Farmall color scheme and badging. Engine starts with difficulty but runs well once operational. Hydraulic controls for the loader mechanism remain functional. The unit shows expected wear consistent with its age and work history, including surface rust and weathering on the bucket and frame components.

Condition Notes: Small hydraulic leak noted. Tires require replacement, but are functional. Body shows significant surface rust and patina throughout. Some areas of paint loss and oxidation on both the tractor body and loader bucket. Farmhand identification plate shows weathering but remains legible with visible serial number and model designation. Refer to the pictures and in-person inspection for condition.

Quantity: 1
