

**Sale Name:** Classic Vehicle Collection Auction American Automotive History a Montana Collection

**LOT 14 - Vintage StarCraft Boat-Car Conversion on Ford Explorer Chassis**

**Description**

Unique custom vehicle featuring a StarCraft fiberglass boat hull mounted on a Ford Explorer chassis/frame. Features Maryland registration, Ford Explorer drivetrain with 4.0L engine, and automotive dashboard/controls integrated into boat cockpit design.

Constructed with fiberglass boat hull, Ford Explorer automotive chassis, aluminum railing, vinyl upholstery, and automotive steering components. Appears to be designed as a functional land vehicle with boat aesthetics rather than an amphibious vessel.

**Condition notes:**

Missing rear axle, extensive upholstery deterioration throughout with exposed foam cushioning, torn steering wheel cover, weathered windshield and gaskets. Vehicle has been stored outdoors for extended period. Engine appears complete but shows significant environmental exposure and corrosion. Wiring harness exhibits weather damage. Mechanical condition unknown but reportedly "run and drove at one point."

Refer to the pictures and in-person inspection for condition.

**Quantity:** 1
