

Sale Name: 14th Annual Montana Spring Auction

LOT 386 - Denon AVR-3805 AV Surround Receiver

Description

Premium Denon audio/video receiver featuring AL24 Processing Plus technology and comprehensive home theater connectivity options. This quality Japanese-manufactured component offers extensive audio and video format support including Dolby Digital EX, DTS-ES, DTS Neo:6, and HDCD digital audio decoding with multi-zone distribution capabilities. The receiver presents with classic brushed aluminum front panel design and premium tactile control interfaces.

The AVR-3805 includes extensive connection options with multiple digital and analog inputs/outputs, component video switching, and 7.1 channel speaker terminals. This mid-2000s model represents Denon's higher-end consumer line with robust internal components and advanced signal processing capabilities. Complete with original AM loop antenna, FM antenna, and speaker wire package. Particularly suited for comprehensive home theater systems or multi-room audio applications.

Condition Notes: Functional unit with normal cosmetic wear consistent with age including minor surface scratches on top panel. All buttons, dials and display function properly. Complete with original speaker wire, AM/FM antennas, and power cord. No missing components or significant damage. Refer to the pictures and in person inspection for condition.

Quantity: 1
