

**Sale Name:** Showroom Floor Model Furniture & Fitness Equipment Auction

**LOT 124 - Half Round Entry Mat Commercial Grade**

**Description**

Half round entry mat designed for commercial and residential entrance areas. Constructed with durable synthetic fiber surface over heavy-duty rubber backing for slip resistance and floor protection. The semicircular shape fits perfectly in front of doors and provides effective dirt and moisture control for high-traffic entrances.

Built for durability with materials designed to withstand frequent foot traffic while maintaining appearance over time. The fiber surface effectively traps dirt, debris, and moisture from shoes before entering interior spaces. Rubber backing prevents mat movement and protects underlying floor surfaces from scratches and damage.

Low-profile design allows doors to open over the mat without interference. The half round configuration maximizes coverage in front of doorways while conserving space. Easy maintenance with regular vacuuming or hosing down for outdoor use.

**Condition Notes:** Shows light use with normal wear patterns consistent with entrance mat application. Fiber surface remains functional for dirt and moisture control with no significant matting or excessive wear. Rubber backing is intact with no separation or cracking. Edges show minor wear but no significant fraying or damage. No tears, holes, or structural damage present. Refer to the pictures and in person inspection for condition.

**Quantity:** 1
